

Naifa Mumtazah Rendiga

Surabaya, East Java | nevamuren@gmail.com | +62 85236323638 | [LinkedIn](#) | [Portfolio](#)

Information Systems graduate with hands-on experience in data analytics, business intelligence, and data engineering, covering the full path from raw data to dashboard. Built Pentaho ETL pipelines and a star-schema data warehouse, designed a PostgreSQL database for a retail analytics project (90k+ synthetic orders), and delivered Power BI dashboards for management reporting at PT Pelindo Energi Logistik. Skilled in SQL, Python, Power BI, and DAX.

EDUCATION

Bachelor's Degree in Information Systems, Institut Teknologi Sepuluh Nopember

2022 – 2026

GPA: 3.59/4.00 (Cum Laude)

Key Coursework: Data and Diagnostic Analytics, Data Lakehouse, Database Systems, Algorithm and Data Structure, Statistics, Business Process Management, Enterprise System, Predictive Modelling and Analytics, Natural Language Processing.

WORK EXPERIENCES

PT Pelindo Energi Logistik - IT Project Support Intern

Aug – Dec 2025

- Developed a Power BI dashboard to monitor customer invoices, covering payment status, receivables aging, top customers, and revenue by business segment.
- Wrote DAX measures for unpaid-invoice percentage and dynamic formatting, and added interactive filters plus a toggle between invoice count and total value.
- Built a WhatsApp help-desk chatbot with Python and Node.js, integrated with internal ticketing APIs to create, check, forward, and close tickets, and to reset passwords.
- Added session locking and a lightweight queue to prevent duplicate requests and conflicts from concurrent messages.
- Standardized API error handling and user messages, preventing repeated prompts and unexpected failures.

Information Systems Department, ITS - Teaching Assistant, Business Performance Dashboard Practicum

Nov – Dec 2025

- Mentored 6 student groups (60+ students) in preparing operational data and building interactive Power BI performance dashboards.
- Guided students in defining business metrics and structuring data models, and reviewed dashboard layouts to give feedback on accuracy and readability.

PROJECT & PORTFOLIO

Sales Analytics Dashboard (Personal Project)

- Designed a 10-table relational PostgreSQL database for retail sales (13k+ customers, 100k+ synthetic orders) with primary/foreign keys, CHECK constraints, and rule-based customer segmentation by completed net sales.
- Wrote a SQL rebuild script with validation checks that roll back the load if business rules are violated.
- Built interactive Power BI dashboards to analyze revenue, product performance, and customer purchasing behavior across sales channels, store locations, and product categories, 2021-2025.
- Developed custom profit-margin measures in DAX and custom SVG/HTML visuals with dynamic CSS tooltips.

Traffic Load Forecasting on Weighbridge with Hybrid TCN-BiLSTM (Undergraduate Thesis)

- Forecasted daily truck volume (731 daily observations, 2024-2025) by building TCN, BiLSTM, and hybrid TCN-BiLSTM models in Python (TensorFlow/Keras) with first-order differencing; the hybrid reached 35.9% MAPE versus 44.3% for the best baseline (linear regression) and 76.3% for Holt-Winters.
- Analyzed why error stayed high on a highly volatile, univariate series, citing sharp spikes and the absence of external factors such as holidays and distribution schedules.
- Built a Streamlit app that displays historical data and forecasts and recommends maintenance dates on predicted low-traffic days.

Data Integration & Warehousing for Participant Selection Tools (Academic Project)

- Built 6 Pentaho ETL transformations, orchestrated by one job, to load a provided star schema (3 fact and 5 dimension tables) from 16 MySQL source tables; repeated the load using SQL-based ELT.
- Implemented surrogate keys, Insert/Update (upsert) logic, lookups, and JavaScript parsing, including a 40+ attribute applicant dimension; validated outputs against an instructor-provided reference database.

IT Performance & KPI Dashboard (Academic Project)

- Designed the metrics, targets, and visuals for IT performance KPIs, including Endpoint Stability Rate, in a team Power BI dashboard covering the four IT Balanced Scorecard perspectives, using simulated data.

Multi-Location Route Optimization for Health Inspection (Academic Project)

- Modeled a vehicle routing problem with time windows (VRPTW) for inspecting 60 hospitals in Jakarta, grouping them into 6 balanced clusters of 10 using constrained K-Means in Python.
- Implemented Particle Swarm Optimization per cluster as one of four algorithms compared by the team (GA, SA, ACO, PSO); PSO gave the lowest total cost and distance (215 km), with cost differences under 1%.

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Sistem Informasi - Secretary of Social Development (Best Staff)

Apr – Dec 2024

- Managed division administration and ran TABMAS fundraising drives supporting Information Systems community members facing hardship, meeting 100% of KPI targets.
- Served as Treasurer for the SINERGI event, overseeing its budget and financial planning.

Information Systems Expo (ISE!) 2024 - Head of Consumption

May – Oct 2024

- Led a team of 8 in planning, vendor negotiation, and procurement of meals for 300+ attendees and staff across multiple events, delivering on time and within budget.

Ini Lho ITS! 2024 - Secretary and Treasurer of Consumption

Sep 2023 – Feb 2024

- Managed a consumption budget of IDR 50 million+ for 1000+ attendees and staff, tracking finances in Google Sheets and keeping spending within budget.

GERIGI ITS 2023 - Treasurer of Consumption

Jul – Aug 2023

- Managed an IDR 130 million+ meal budget, vendor negotiations, and expense tracking for a 3-day orientation serving 6,500+ freshmen and committee members.

SKILLS & LANGUAGES

Analytics & BI: Power BI, DAX, Excel, Data Visualization, KPI Design

Data & Databases: SQL, PostgreSQL, MySQL, Pentaho Data Integration, ETL/ELT, Data Warehousing, Star Schema

Programming: Python (pandas, NumPy, scikit-learn, TensorFlow/Keras), Node.js, Next.js, HTML/CSS

Tools: Streamlit, REST API, Git

Soft skills: Analytical Thinking, Problem-Solving, Attention to Detail, Communication, Teamwork, Leadership, Proactive

Languages: Indonesian (native), English (advanced)

LICENCES & CERTIFICATES

Data Analysis – MySkill (Issued Sep 2026)

DevNet Associate – Cisco Networking Academy (Issued Sep 2025)

Boost Productivity with Gemini in BigQuery – Google Cloud Skills Boost (Issued Mar 2025)

Secure BigLake Data – Google Cloud Skills Boost (Issued Feb 2025)
